As of 1 June 2022, an additional luggage service will be launched as part of a pilot. No green label covers will be required, the customs declaration is generated digitally, and the booking is made online by the customers. This offer is constantly being expanded.

Passengers flying with Swiss to Switzerland will have their luggage automatically forwarded to a Swiss address. This means that guests do not lose time waiting for their bags and can transfer directly to the connecting train at Zurich Airport. The service can also be booked in the opposite direction.
