Deactivation of STS standard product range on RailTicketing

As of: 16.07.2019

mystsnet.com

In August 2019 the Swiss Travel Pass Flex will be available as an e-ticket, making the entire STS standard product range e-ticket-capable.

The sale of the STS product range via AgentClient and SBB Webservice as e-tickets offers the following advantages, among others:

- ✓ Tickets can be refunded up to 1 day before the 1st day of validity directly in the system and without charges.
- ✓ Tickets can be sent electronically.
- ✓ Printing on specific ticket paper with corresponding stock control is not required.
- ✓ Tickets can be resent to customers or reprinted at any time.

In order to keep the costs for article maintenance as low as possible, the articles will be deactivated on RailTicketing after a three-month transition period. If necessary, please adjust your internal booking processes accordingly. Thank you.

STS ticket	Article number RailTicketing	Deactivation date RailTicketing
