### Eiger Express

Since December 2020, the new 3S cableway Eiger Express takes guests from the top modern Grindelwald terminal to the Eiger Glacier station in just 15 minutes. Having to change transportation only once in a straightforward way, visitors reach the Jungfrauoch – Top of Europe a full 47 minutes faster than before, which leaves more time to experience and admire: views onto a majestic panorama and attractions such as the Ice Palace or the Snow Fun Park delight visitors at 3,454 metres (11,332 ft) altitude.

## Mountain highlights.

### Snow Fun Park.

At the Snow Fun Park guests can get refreshed and try their hands at various winter sports. "Snowtubing" with pirouettes on an inflated hoop, speeding down the slope on a sledge, zip-lining over eternal ice on the Flying Fox or skiing and snowboarding – all of this is possible in the Snow Fun Park. What's more, it can be done spontaneously: equipment is available for rent right there. The ultimate way to experience snow in summer!

### Sphinx viewing platform.

Pressing a button, shooting up, enjoying the mountain panorama: it takes the lift a mere 25 seconds to overcome 108 metres (354 feet) altitude and arrive at the viewing platform at 3,571 metres (11,716 feet) a.s.l. Once there, it's just a matter of inhaling deeply and enjoying the view. Incidentally, Europe's highest research station is also located at the terrace. It is of paramount importance to environmental scientists, astrophysicists and meteorologists.

### Ice Palace.

The more ephemeral – the more beautiful! This is especially true for the "Ice Palace" and its treasures. With ice pick and saw, mountain guides created the halls and corridors in the middle of the Jungfrau firn in the 1930s. Today, artists shape the ice – with a delicate touch. On an icy round tour through this frosty world, guests discover artworks in many niches. Eagles, penguins and bears look like they've just solidified into ice, that's how real they appear. A heart-melting experience, even at minus temperatures.

### Alpine Sensation.

Anybody who steps into the 250-metre (820 feet) long corridor leading from the Sphinx hall to the Ice Palace experiences a shiver down the spine. And that's not only due to the freezing temperatures but also to the memory of the sacrifices that mountain workers made in order to open the Jungfrauoch to railway technology. 30 memorial plaques bear witness to it. The background music causes goose bumps as well: together with pictures of touristic visionaries, it lets the beginnings of the Jungfrau Railways come to life.

### Jungfrau-Panorama.

There are times that one "cannot see the mountain for all the clouds" on Jungfrauoch. That has nothing to do with bad weather, however – on the contrary. Clouds are fascinating. Who hasn't dreamed of bathing in that fleecy-soft miracle? The Jungfrau Panorama film makes it possible. It offers a 360° panoramic experience of the mountain world, the way it could never be had otherwise – 365 days a year. The camera takes visitors for a dive into the clouds, let them sink into crevasses and plunge into masses of snow. Independent of what the weather is doing outside.
