# STS ticket range & prices 2022.

mystsnet.com

The Swiss public transport industry is constantly analysing its product world and examines possibilities for improvement in national and incoming traffic. A balanced and fair adjustment of the product range is aimed at for the future. Swiss public transport is thus being strengthened by a harmonised, needs-oriented product range at an attractive value-for-money ratio.

The responsible public transport committees have therefore decided on the following changes in the STS ticket range as per 01 January 2022:

- **Price reduction for the Swiss Travel Pass and Swiss Travel Pass Flex 8 days and 15 days by an average of 20% (incl. net prices)**
- **Introduction of a 6-day Swiss Travel Pass and Swiss Travel Pass Flex**
- **Increase of discount on Youth Passes for young travellers from currently 15% to 30%**  
*Due to the general price reduction for 8-day and 15-day passes, these Youth Passes see a massive discount. For example, an 8-day Swiss Travel Pass Youth in 2nd class costs CHF 276 instead of CHF 357 as of 2022.*
- **Adjustment in eligibility for Youth Passes:** Young travellers up to the age of 24.99 years are now eligible to obtain a Youth Pass (previously 25.99 years)
- **Waiver of the introduction of peak prices for the STS ticket range**

Swiss Travel System AG is convinced that these price reduction as well as the introduction of a 6-day pass will have a positive effect on the public transport travel behaviour of international guests. Thanks to these encouraging impulses, the company is looking ahead to the coming year with confidence.
